A key element for the Catalonia.AI strategy

The CIDAI is one of the four pillars of the Artificial Intelligence Strategy of Catalonia (CATALONIA.AI), a strategy that establishes priorities and lines of action to turn Catalonia into a pole of innovation, leadership and attraction of talent and companies in the field of artificial intelligence.

Mission

Demonstrate the advantages and speed up the adoption of innovative data exploitation technologies and artificial intelligence in the Catalan economic ecosystem.

Vision

Promote the Catalan ecosystem to become an international benchmark for innovation and the adoption of reliable AI, both in the business and social spheres.

DIH4CAT Member

The CIDAI follows the guidelines of the Digital Innovation Hub defined by the European Commission. It works as a network center to serve companies and institutions.

The Digital Innovation Hub of Catalonia is a regional ecosystem of non-profit innovation, formed by the main agents supporting the digitalization of Catalonia, which aims to promote the technological transformation of Small and Medium Enterprises (with a special focus on industrial sectors and technology suppliers), technological start-ups and public entities.

Proximity

In constant dialogue with companies and organizations throughout the region to assess their main challenges and opportunities.

Of utility and impact

Prioritize and promote the most relevant initiatives to inspire and facilitate access to state-of-the-art technologies.

Excellence, neutrality and ethical principles.

Activities and projects led by sector experts, with continuous technology exploration and ethical application and best practices.

REGIONAL GRANTS

Programa de Apoyo a los Digital Innovation Hubs (PADIH)

Who can apply?

SMEs with an operational establishment in Spain.

What is subsidized?

The contracting of services for the adoption of advanced digital technologies:

- Consultancy and technological advice, **up to €10,000**
- Testing, experimentation and validation of the use and/or application of advanced digital technologies in the company through the use of technological infrastructures (such as laboratories, equipment and technological platforms) of the Digital Innovation Hub, as a preliminary step to potential scaling after the technological solution and its implementation in the form of projects, **up to €20,000**
- Technological training (individual or group), **up to €5,000**
- Advice on finding financing funds for advanced and scaled technology projects, **up to €5,000**

Grant: Up to **€30,000** for the contracting of several services to a single DIH

Opening Date: 30/01/2023 / <https://www.eoi.es/es/padih> / Direct accès to the call

Budget: 16.645.528 €

Application deadlines: Until September 30, 2025. Services finalized on 12/31/2025

Cupons ACCIÓ de Tecnologies Digitals Avançades

Who can apply?

Companies (Small, medium, large) with an operational establishment in Spain.

Objective:

The object of this line is the contracting of an advisory service for the testing, experimentation and validation of the use and application of advanced digital technologies in the company, through the use of technological infrastructures (such as laboratories, equipment and technological platforms) of a Digital Innovation Hub (financed by the EC), as a preliminary step to the potential subsequent scaling of the technological solution and its implementation in the form of projects.

Expected results:

- Technological feasibility studies.
- Analysis of new business models based on the use of advanced digital technologies.
- Proof of concept and results validation services.
- Development of prototypes and pilot tests (testing of the product or service).

Grant: up to 20.000€

Budget: 1.400.000€

Application deadlines: Until reach the total budget.
