

YEAH Youngsters EngAgement in Health

Programa de capacitación

Begonya Nafria
Patient Engagement in Research Coordinator
Hospital Sant Joan de Déu

Objetivo

Educar a los jóvenes para que se involucren en la investigación en salud, específicamente en ensayos clínicos y dispositivos médicos para garantizar que la investigación esté centrada en el paciente.

¿Por qué es importante involucrar a los jóvenes?

Los jóvenes representan el

21%

de la población mundial

Los jóvenes representan el

100%

del futuro de una sociedad saludable

≡ Derecho a la ciencia/a la investigación

Los niños y los jóvenes tienen **derecho a expresar libremente sus opiniones** (CDN art. 12), el **derecho al más alto nivel posible de salud** y a instalaciones para el tratamiento de enfermedades y la rehabilitación de la salud **(incluida la investigación)**.

Convención de los Derechos del Niño- 1989 – Naciones Unidas

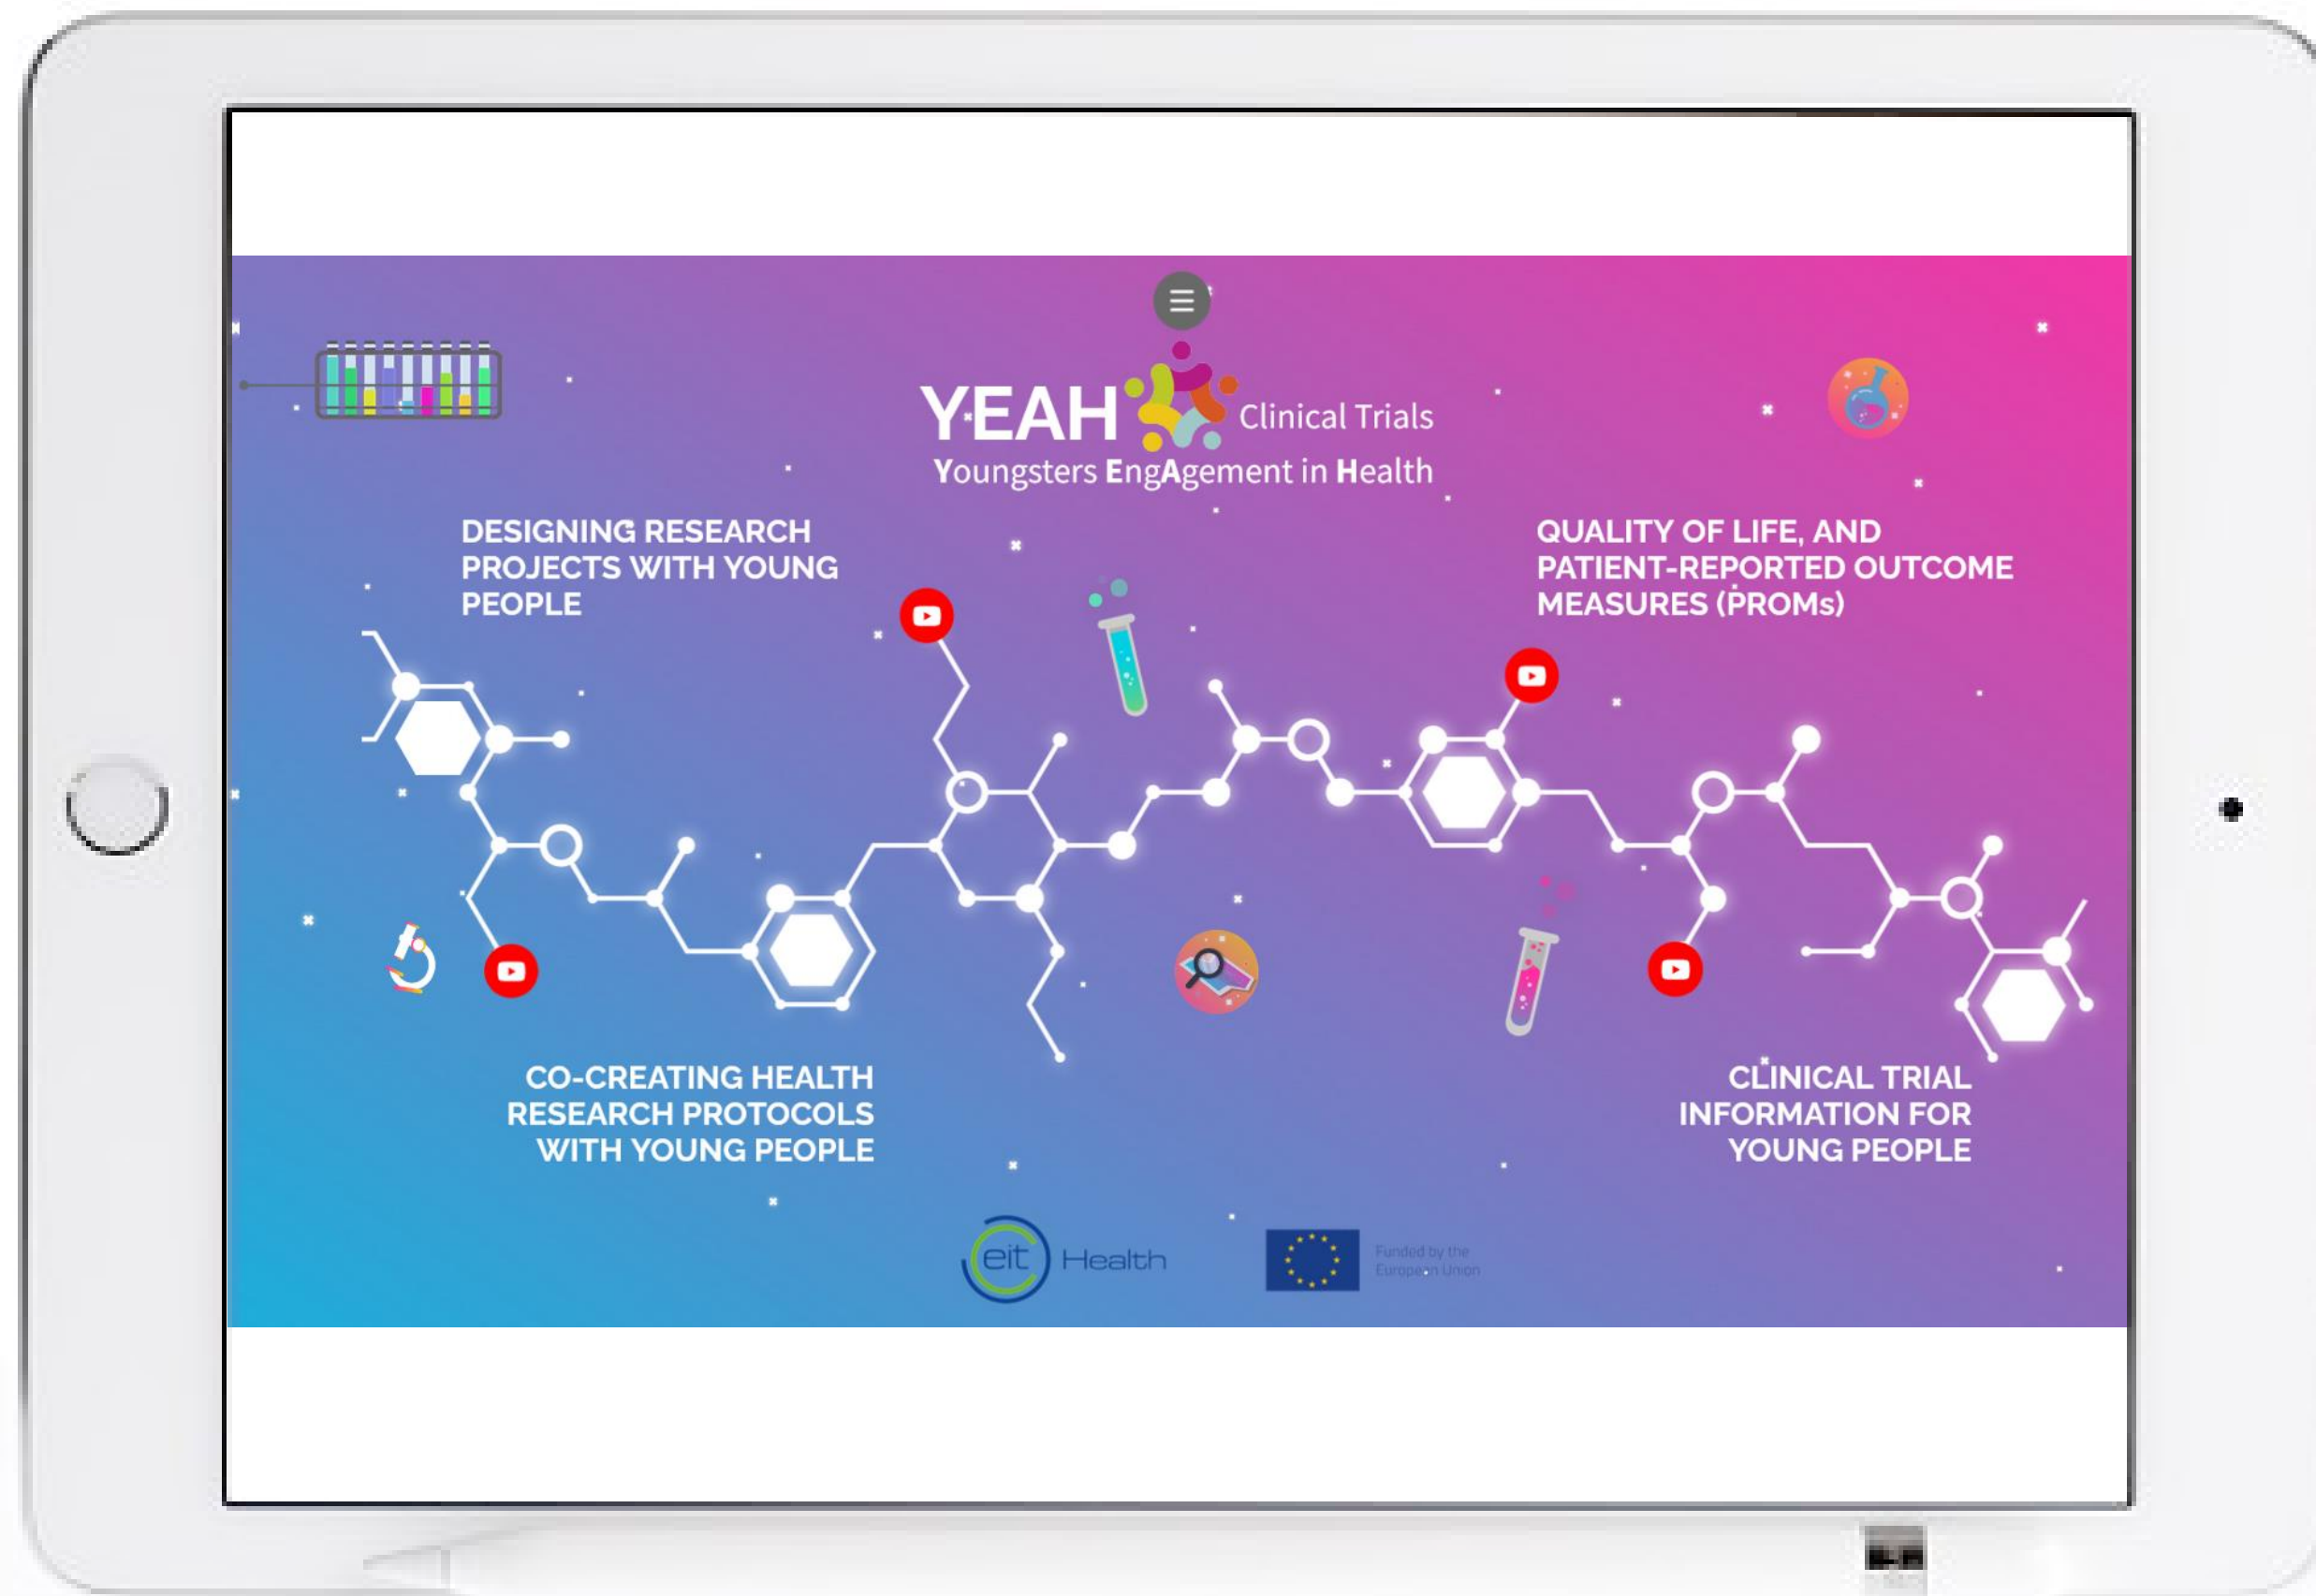

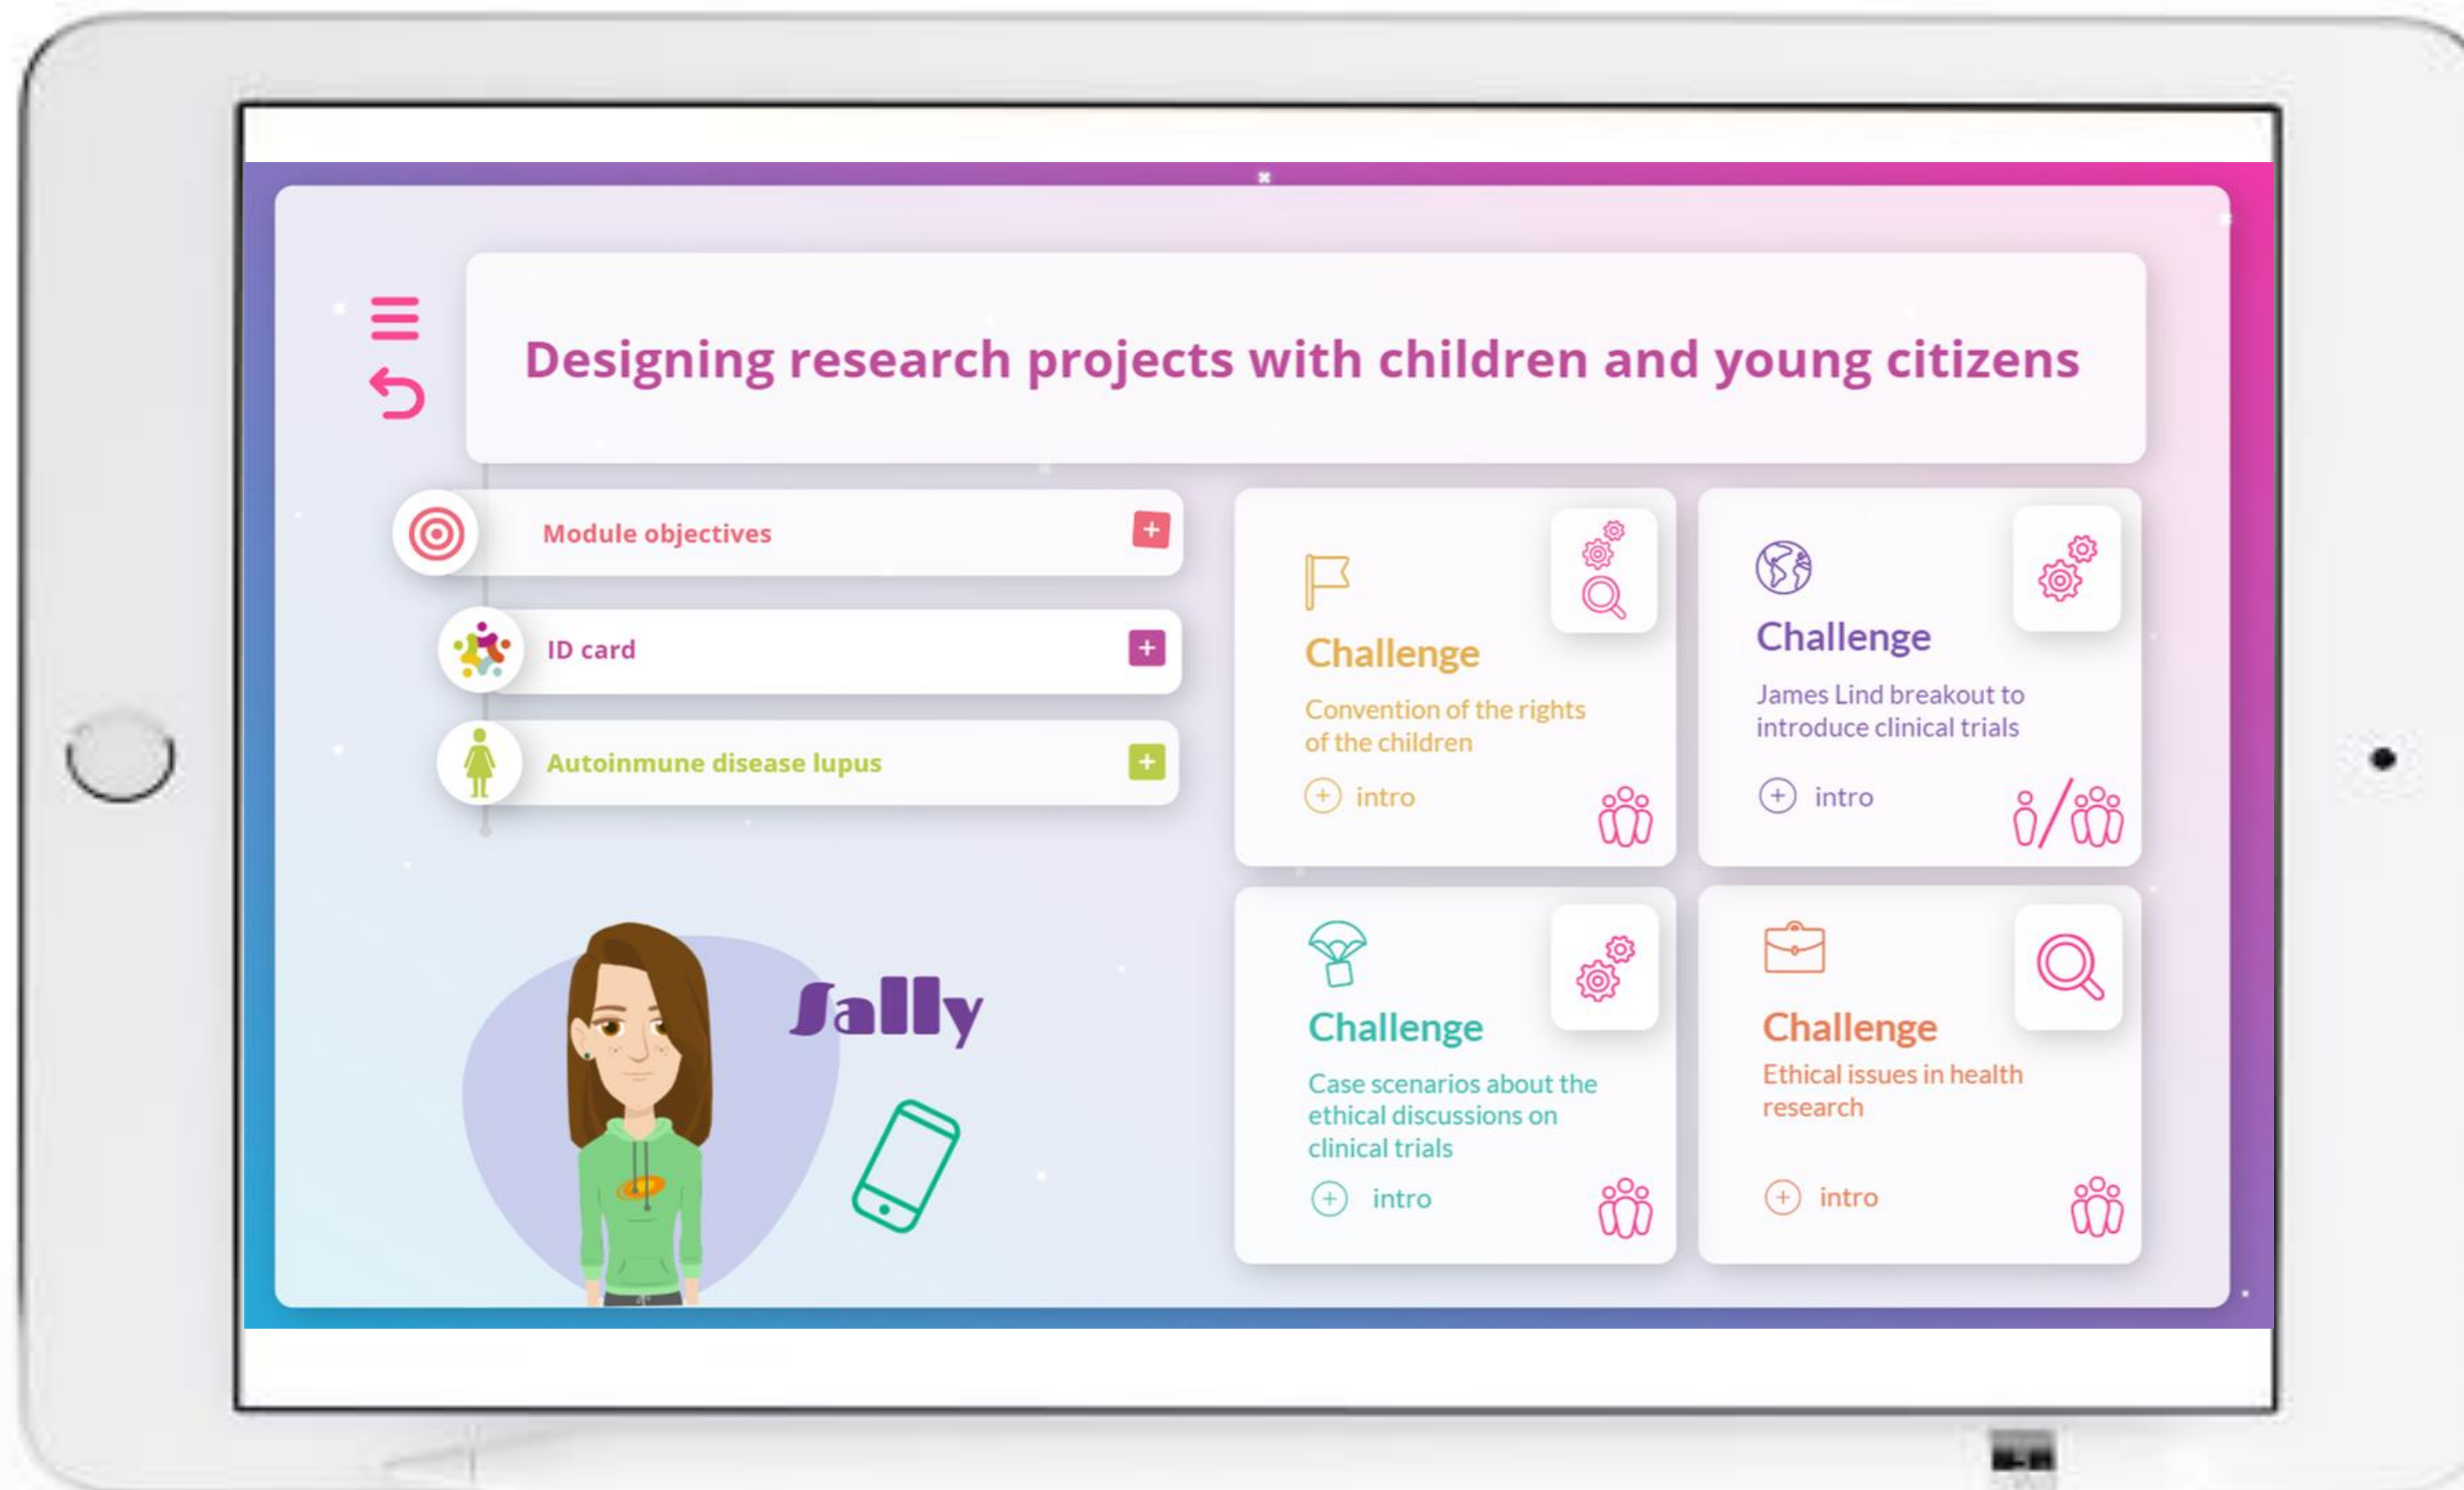

Co-creación del contenido:

- Toolkit- actividades educativas
- Guías didácticas
- Juegos sobre datos en salud

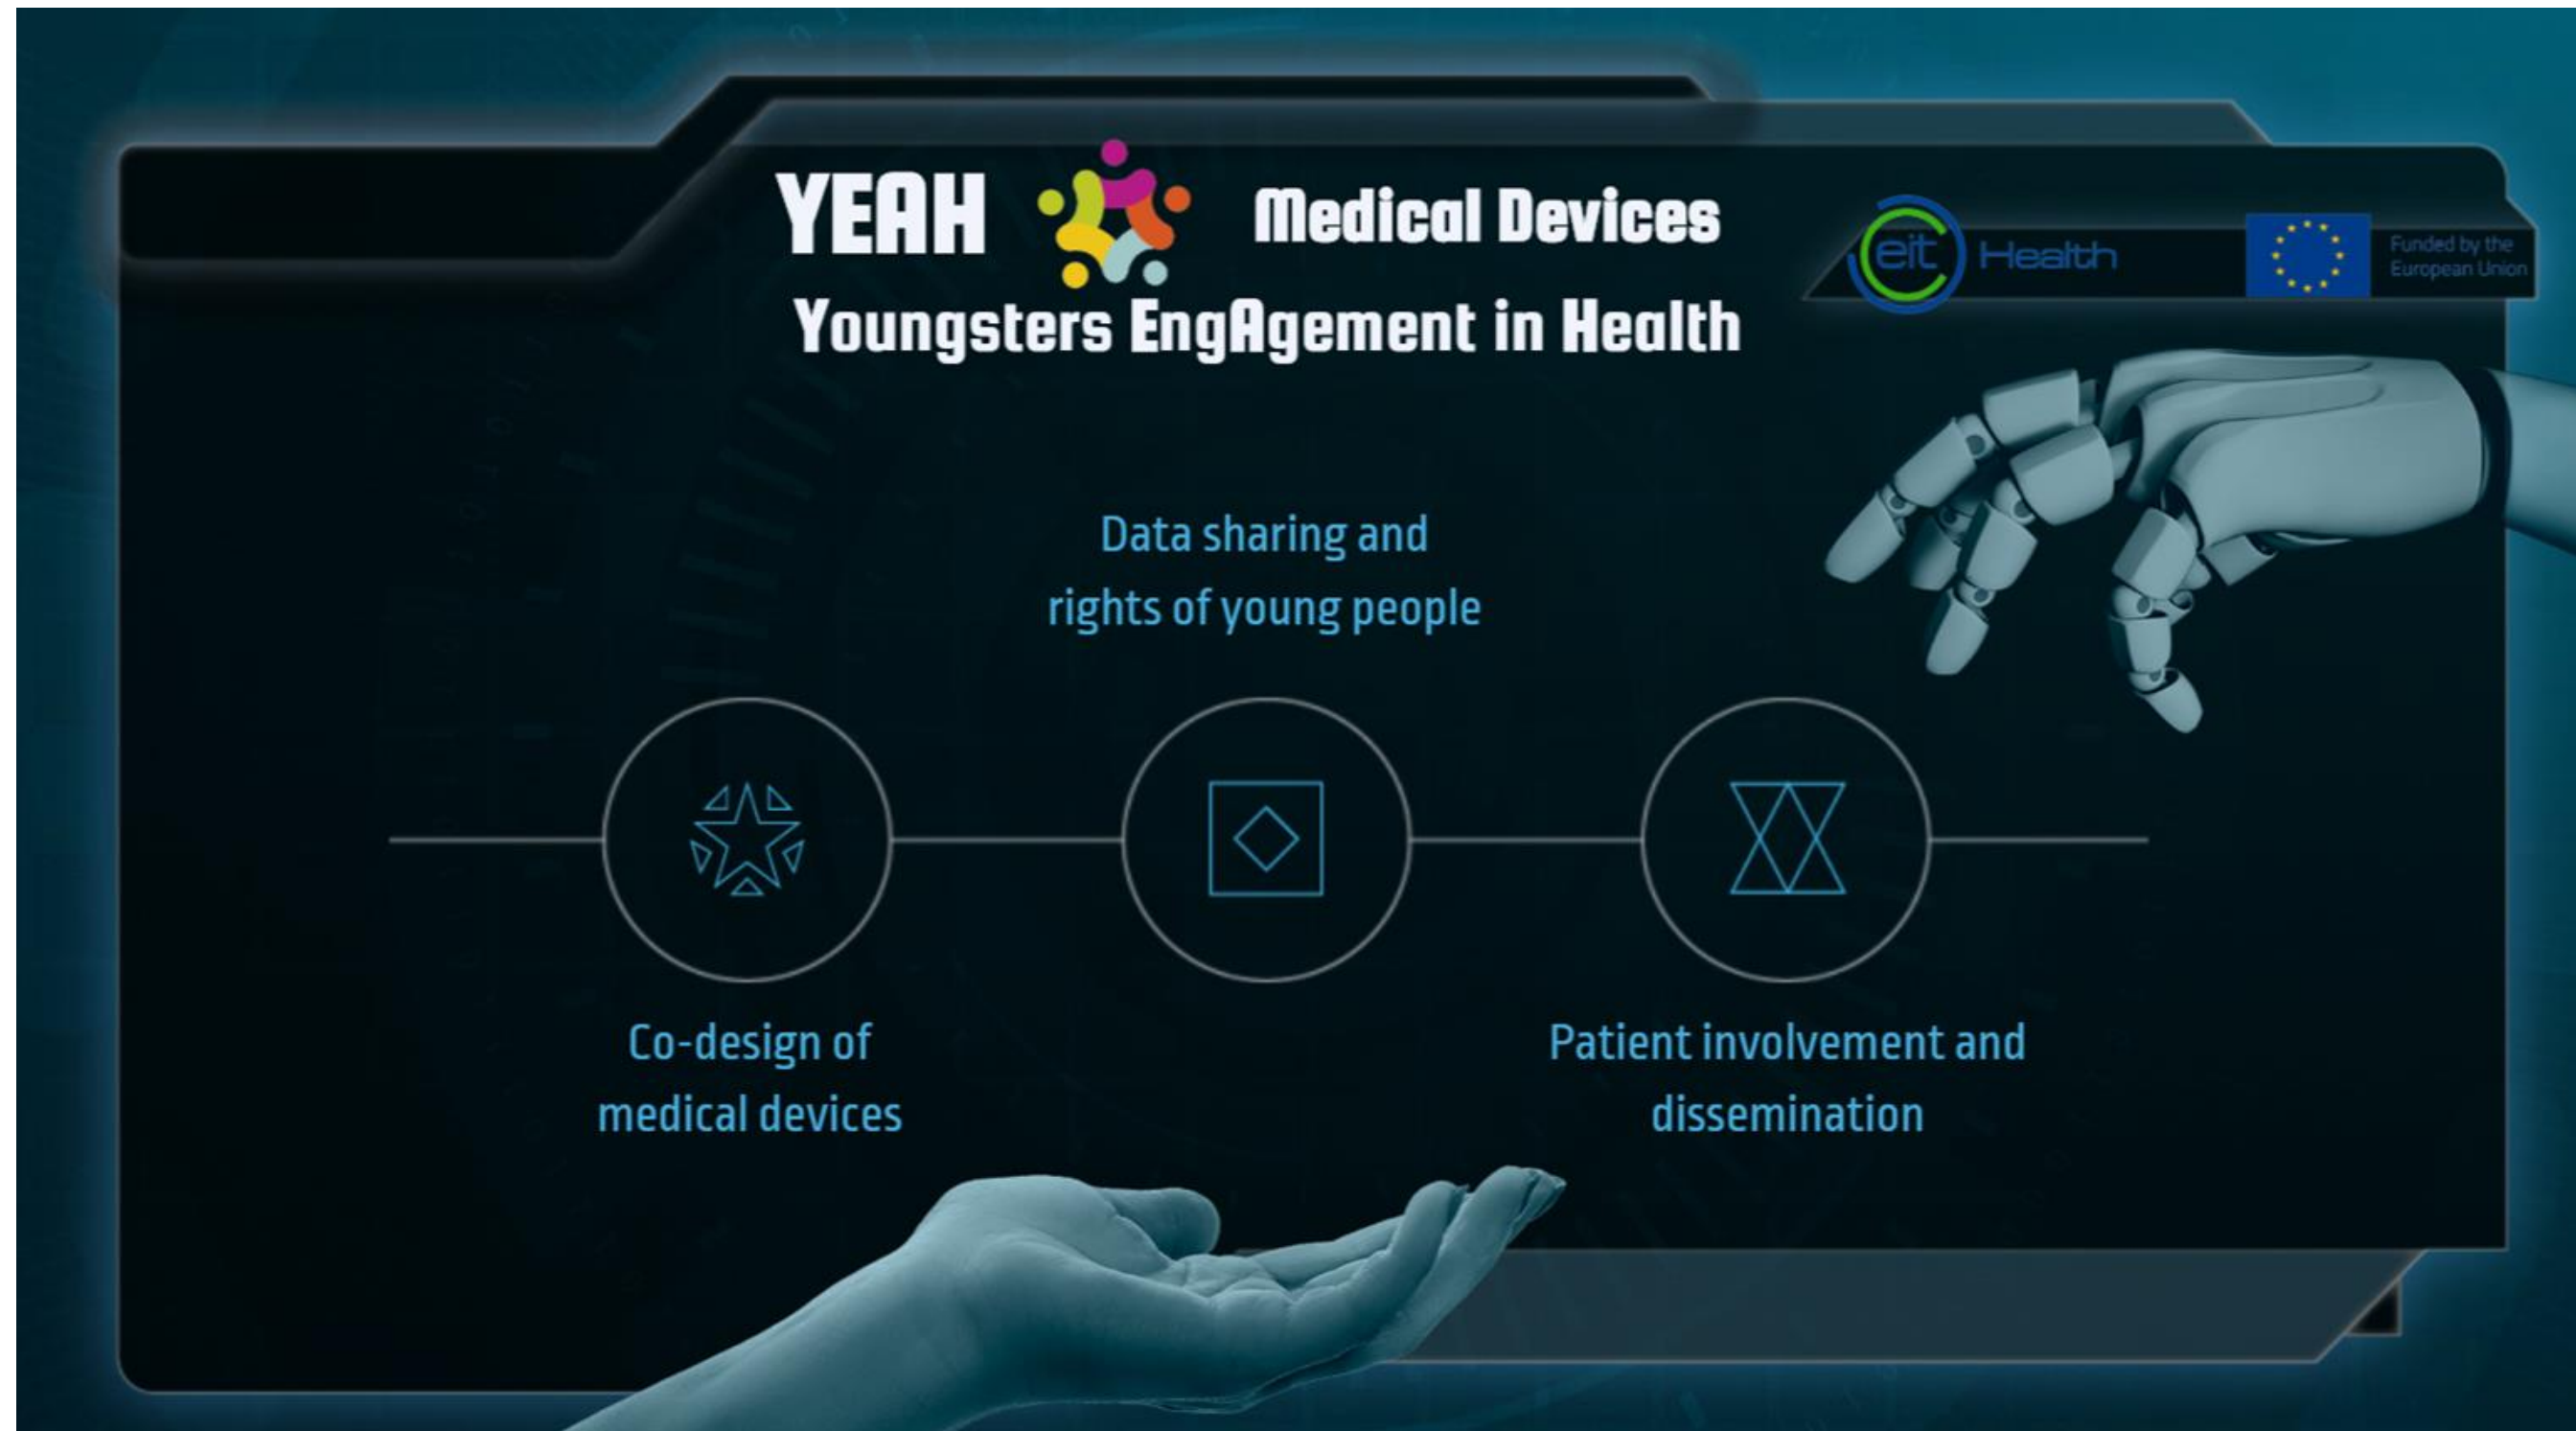

YEAH 1: Ensayos clínicos

YEAH 2: Dispositivos médicos

Technology and Medical Devices. How can they change lives?

Charlotte was diagnosed with ME/CFS when she was 15 after two years of symptoms and tests at her local hospital.

Case

Her symptoms can vary hugely each day but include severe muscle and joint pain making it extremely difficult and sometimes impossible to walk.

She also has very bad headaches, dizzy spells and sickness and suffers from extreme fatigue.

Her mental and emotional health has been greatly affected as she cannot attend school and is largely bed-bound at home.

Bio

Before her diagnosis Charlotte was a very active teenager and had a large group of friends. She enjoyed school and was a happy and active young person. Now life is very different and her condition has impacted on the whole family.

Some of Charlotte's friends are understanding and come to visit her, but this can also be difficult.

Wants

★ Now life is very different and has impacted on the whole family.

Frustrations

Charlotte would love to get the grades to attend university in a couple of years but, due to her symptoms and the huge impact ME/CFS is having on her life she worries this might not be possible.
