

ONALABS

The New Sweat Digital Biomarkers Platform

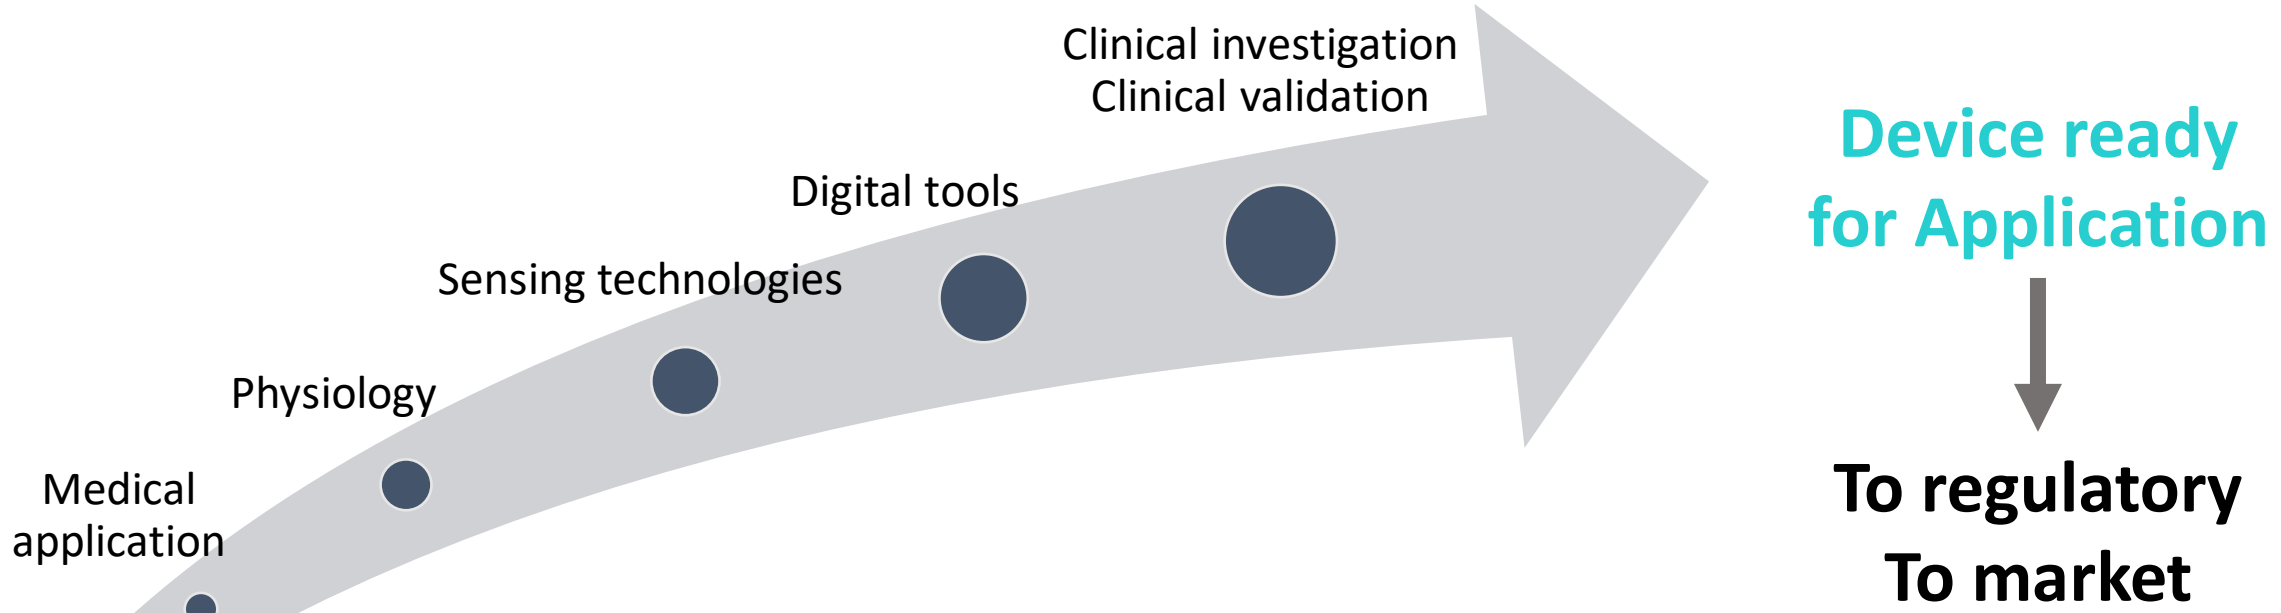

for a new health monitoring paradigm

Dr. Xavier Muñoz-Pascual
CSO & Co-founder

**Our
Innovation
approach**

Our goal is to identify specific use cases, develop accurate sensors and application-specific algorithms to offer new tools for end-users

**Development aimed to meet both users and healthcare professionals needs.
We want to provide reliable and specific data, avoiding data noise.**

Our Patented Technology

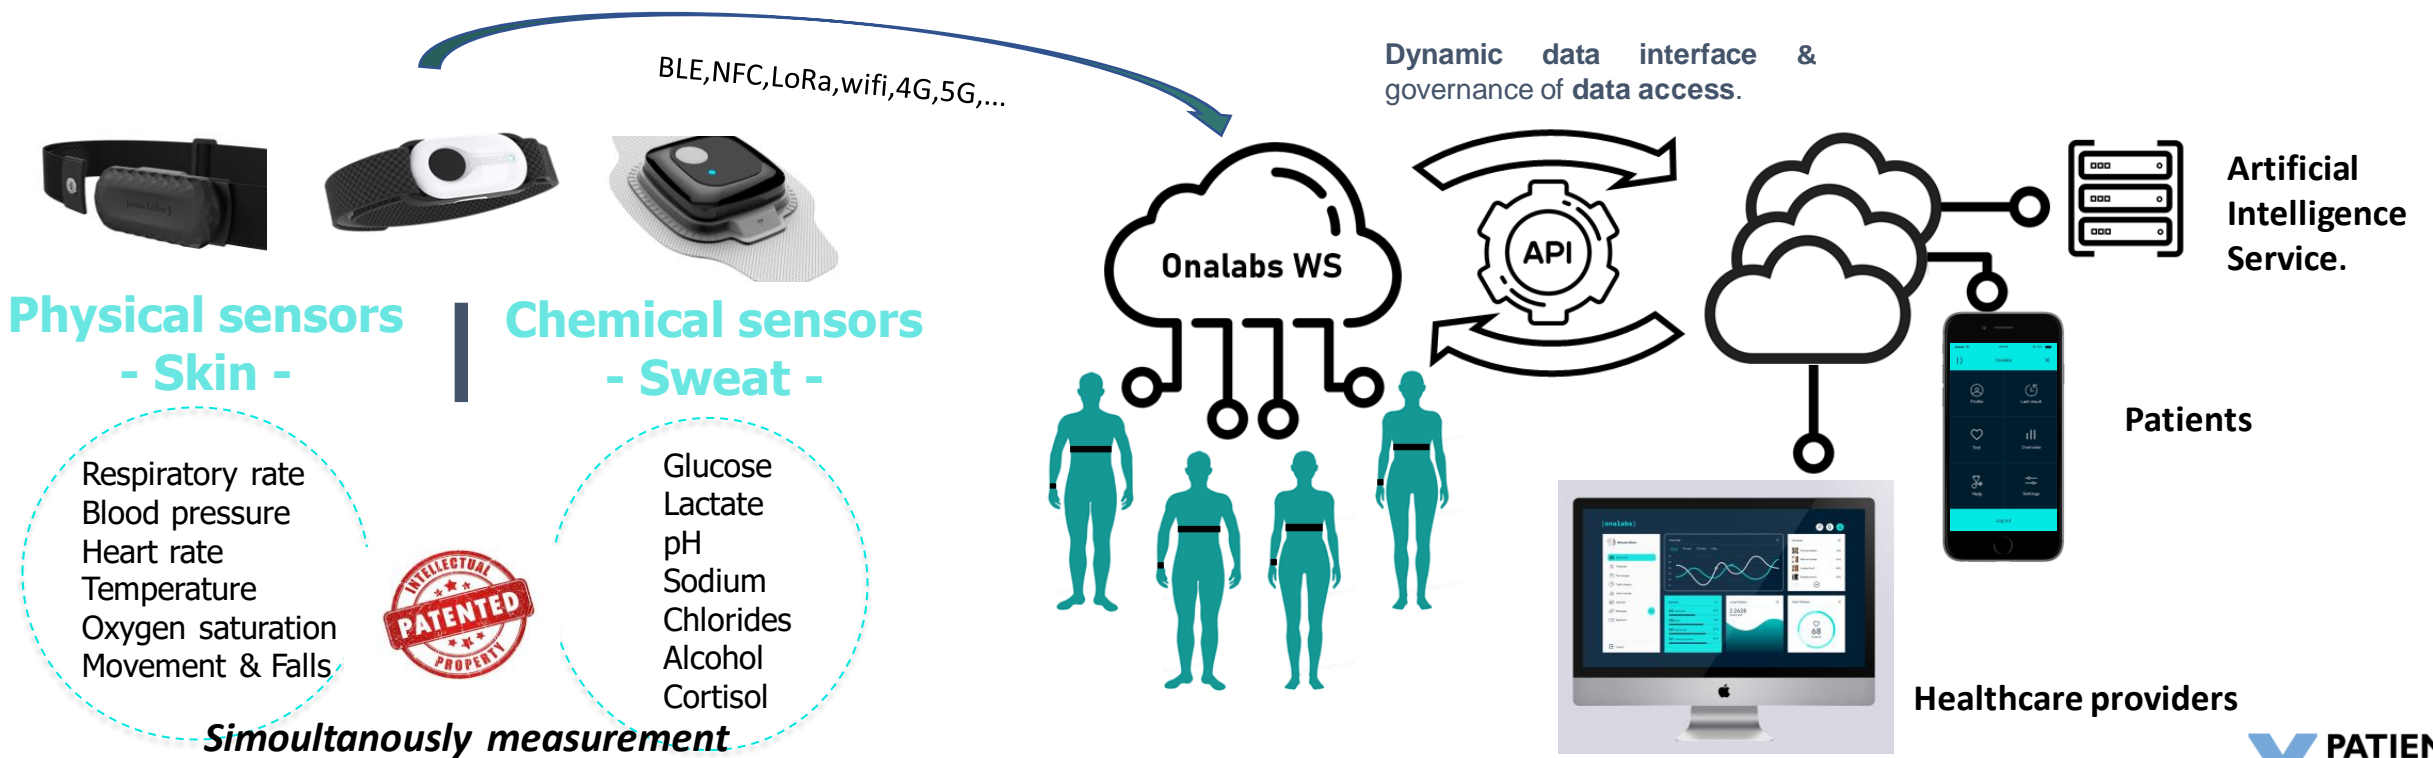

We convert sweat into an intelligent biofluid & skin in a health data platform

Towards a totally new health cloud services

1) A new generation of own medical wearables

2) A new generation of Data Science Engineering & Management

3) A new generation of Health Apps

How we Create Impact

We offer sweat digital biomarkers solutions to personalized health insights & enhanced models of care

Hundreds of new potential clinical applications

More than 200 metabolites & ions, 800 proteins and 32.000 endogenous peptides could be measured in sweat

Our innovation will contribute to reshape health care in **five** big impacts:

- 1. Empowering patients** offering health monitoring everywhere, every time and without realizing it.
- 2. Offering rigorous data to clinicians** for improve early diagnostic and personalized treatment.
- 3. Giving more business opportunities to biopharmas, CROs & Research Centers** integrating digital measurements across continuum of research and clinical care.
- 4. Improving healthcare sustainability** facilitating home hospitalization and real telemedicine
- 5. Contributing global management of diseases** thanks our poblational biometric database.

2) Healthcare Providers

3) Biopharma, CRO and Researchers

1) Health Consumers & Patients

4) Healthcare system sustainability

5) Governamental Institutions & Policy I

Onalabs wearables

A new generation of medical wearables for non-invasive, real time, remote, smart and personalized health monitorization

ONA SPORT

FOR SPORT MEDICINE & PERFORMANCE

Continuous measurement in real time of internal body biomarkers for Smart training and higher performance

- ✓ Chest strap for heart rate plus consumable measurements.
- ✓ Consumables: dehydration (sweat rate, sweat conductivity) and lactate. (Glucose and sodium under development).
- ✓ Free/Premium App to visualize data & recommendations

- ✓ Wrist band/patch with heart rate, skin temperature, oxygen saturation, activity and falls (Continuous blood pressure, respiratory rate and glucose monitorization under development.
- ✓ Free/Premium App to visualize data & recommendations

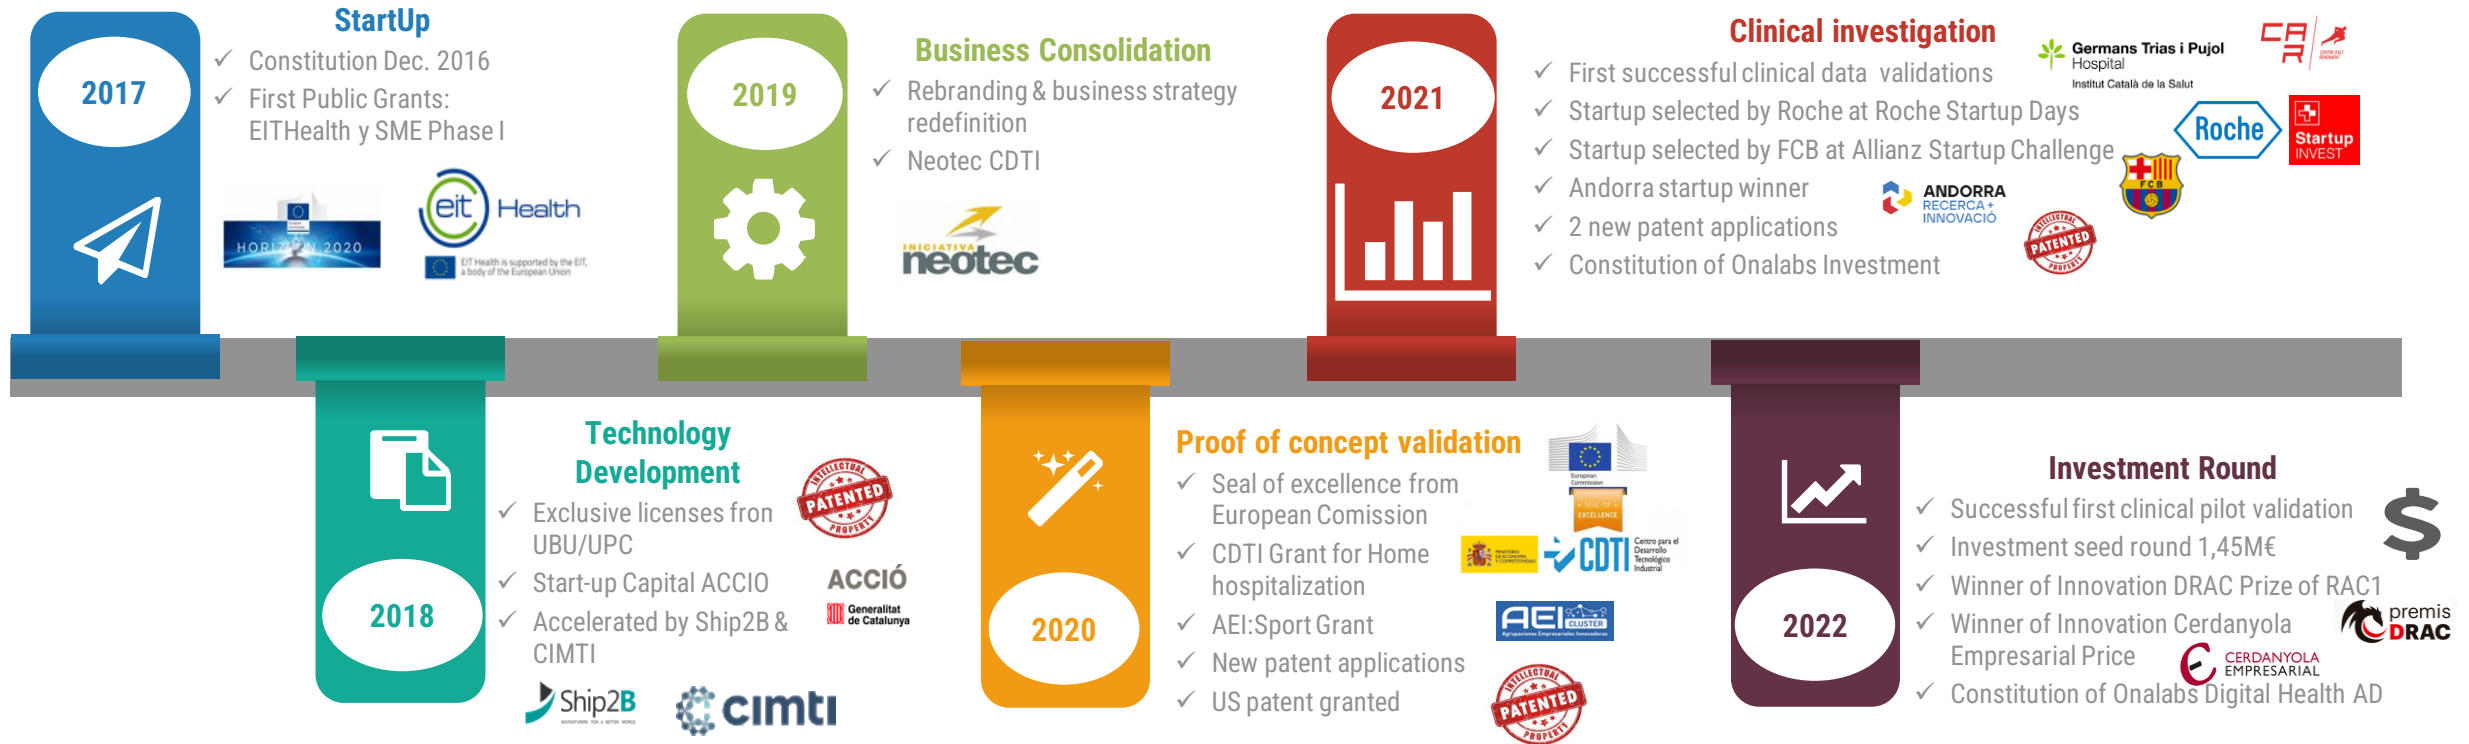

ONA MEDICAL

FOR CHRONIC PATIENTS/ HOME HOSPITALIZATION /DIABETES

Continuous monitorization in real time of internal health biomarkers to improve prevention and treatment.

Our Journey

| Join our project!)
Time is now.
